-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claim 1 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/6/04.

2. Applicant's election without traverse of claim 3 in the reply filed on 8/6/04 is acknowledged.

3. The information disclosure statements filed 8/10/01 and 1/3/03 fail to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. Specifically, none of the foreign patents mentioned on the IDS filed 8/10/01 and document A2 of IDS filed 1/3/03 have been provided.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical

Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claim 3 is rejected under 35 U.S.C. 102(a) as being anticipated by the admitted prior art of record as set forth on pg 1 of the instant specification. The admitted prior art teaches a synthetic resin hollow member having an intermediate element located between thermally welded portions of the member.

6. Claim 3 is rejected under 35 U.S.C. 102(e) as being anticipated by Aksberg (USPN 5885499). Aksberg teaches the claimed synthetic resin hollow member having an intermediate element located between fused portions of the member. See figs 1-6.

7. Claim 3 is rejected under 35 U.S.C. 102(e) as being anticipated by Ruschke (USPN 5556541). Ruschke teaches the claimed synthetic resin hollow member having an intermediate element located between fused portions of the member. See figs 5-9.

8. Claim 3 is rejected under 35 U.S.C. 102(e) as being anticipated by Leason (USPN 4113627). Leason teaches the claimed synthetic resin hollow member having an intermediate element located between fused portions of the member. See figs 1-16.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to EDMUND H. LEE whose telephone number is
